Data Dictionary

AeroGrid

Low-Altitude Airspace Intelligence Warehouse

AeroGrid Development Team

October 24, 2026

1 Introduction

This document serves as the formal Data Dictionary for the AeroGrid Data Warehouse, detailing all dimension and fact tables, columns, data types, key classifications, and business descriptions.

2 Summary of Tables

- **Dimensions:** `DimTime`, `DimVehicle`, `DimAirspaceZone`, `DimWeather`, `DimSpatialGrid`.
- **Facts:** `FactVehicleTracking`, `FactFlightJourney`, `FactCloseEncounter`, `FactRestrictionActivati` `FactAirspaceOccupancy`.

3 Key Standards

- Surrogate keys (`_key`) are utilized across all dimension tables.
- Natural keys (`_id`) preserve source system identifiers for lineage tracking.
- Altitude measures are standardized to feet MSL (`altitude_ft`).

4 Detailed Schema Reference

For complete column definitions, data types, and analytical use cases, refer to the master data dictionary in `data/data_dictionary.md`.
